AIM

CONNECT project aims to strengthen the profile of teaching professions by building their skills and competences for developing and delivering high-quality online courses complementary to the in-class activities. The lack of such skills and competences has been highlighted during the COVID-19 crisis, where many teachers faced problems and difficulties during the hard shift from the in-class to online teaching and training. CONNECT will have a positive impact on students and teachers by the following means: improving student engagement, encouraging self-paced learning, affording better access to resources, promoting innovative teaching techniques, enriching teaching practice, promoting teaching career development. The teachers will be trained through Massive Open Online Courses (MOOCs) and a face to face training event.

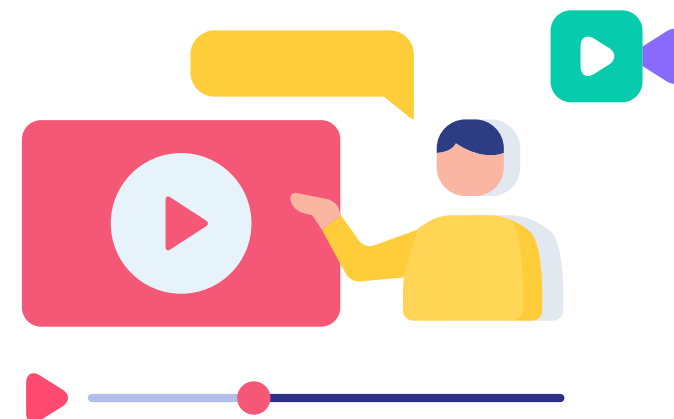

#ConnectErasmusProject

OBJECTIVES

- To foster the exchange of knowledge, expertise and best practices among a wide community of European teachers of schools, head of schools, school advisors, educational authorities and other actors of school ecosystem to better equip teachers for online teaching and education.
- To develop the digital pedagogical competences of teachers, enabling them to deliver high quality online courses based on novel educational scenarios.
- To make teachers aware of how to effectively incorporate digital online technology into subject-specific teaching and learning: Language, Physics and Mathematics.
- To increase teachers' and schools' interest, especially during the post-COVID19 period, in using ICT for online education, by publishing good practices and teacher guidelines in online education.
